IEEE GUB Student Branch

Green University of Bangladesh

Report ID : IEEEGUBSB/2026/Report-07
Date : 17 October 2026
Time : 2:00 PM
Venue : A-302
Report Name : IEEE ExCom 2025 Farewell Ceremony

Header

The IEEE GUB Student Branch, Green University of Bangladesh, organised the IEEE ExCom 2025 Farewell Ceremony on 17 October 2026, co-organised by IEEE Computer Society (IEEE CS) and IEEE Power and Energy Society (IEEE PES). The programme featured a flashback presentation, speeches from outgoing leaders, a special guest address, the formal committee handover, and award distribution. The event celebrated the achievements of the outgoing committee, recognised the contributions of members and volunteers, and welcomed the incoming leadership, highlighting teamwork, accountability, and continuity within the IEEE GUB community.

Description

The programme began at approximately 2:36 PM with a presentation showcasing the activities, achievements, and contributions of the IEEE 2025 Executive Committee. A flashback presentation accompanied by background music highlighted memorable moments from the committee's journey, including the STI 2025 programme. The presentation offered attendees an opportunity to reflect on the committee's accomplishments and the collective efforts that contributed to the development of the IEEE GUB community. The event was hosted by Aara Ali and Nousad Himel, who guided the audience through the different segments of the ceremony.

The programme then proceeded with speeches from the outgoing leadership. SM Shakib Mahmud, Chair of IEEE PES in 2025, was invited to the stage as part of the recognition segment for the outgoing leadership. Following this, Foysal Ahmed Tomal, IEEE Alumni Mentor and Former Chair of the IEEE Student Branch in 2025, shared reflections on his leadership experience and the relationships developed within the IEEE GUB family. He emphasised that effective leadership is demonstrated through responsibility, teamwork, dedication, and everyday actions. He also highlighted that leadership positions are temporary, while meaningful relationships, shared experiences, and contributions remain valuable over time. The segment concluded with a farewell message and a symbolic signing activity, marking the end of the outgoing leadership's tenure.

The ceremony continued with an address by special guest Monirul Islam, who appreciated the unity and collaborative spirit of the IEEE GUB community. He discussed the history of IEEE and the significance of IEEE Day, referring to the organisation's roots in the technical meeting held in 1884 and the first IEEE Day celebration in 2009. He also highlighted the establishment of IEEE GUB on 17 May 2017 and acknowledged the support of faculty members, particularly Professor Razzaq, during its development. He recognised GUB as one of the notable IEEE student branches in Bangladesh and encouraged members to continue contributing to the organisation through collaboration, technical engagement, and dedication.

A major highlight of the programme was the IEEE Committee Handover Ceremony 2025–2026, during which the outgoing 2025 leadership formally transferred responsibilities to the incoming 2026 committee. The ceremony symbolised the continuation of organisational leadership and reinforced the importance of accountability, teamwork, and commitment to the IEEE mission. The incoming committee was encouraged to build upon the achievements of its predecessors and expand the branch's activities through innovative initiatives, technical programmes, professional networking, and greater student engagement. The handover also represented an important step in preserving institutional knowledge and ensuring continuity in the branch's future activities.

The programme subsequently featured an award distribution segment coordinated by Rakib. The recipients were recognised for their contributions and involvement in IEEE GUB activities. The award recipients were Tonmoy Kranty Das, Emon Miya, Rabu Sufian Rafayet, Meherin Jarin Khan, Abu Rayhan Imran, Nasimul Hasan Nayem, Abdullah Mohammad Ghalib, Mohammad Moyol Hasan Nirob, Alamin Arnob, Jubarul Hasan Mahin, Nayhan Reja, SM Shakib Mahmud Rifat, Noor Mohammad Shakib, Mahir Jabin Priya, Anas, Meheraj Khandakar, Mohammad Atik Hasan, and Atikur Rahman. The segment acknowledged the dedication and efforts of the members who contributed to the branch's activities and encouraged continued participation in future initiatives.

The Guest of Honor then addressed the audience, appreciating the technical expertise, enthusiasm, and commitment demonstrated by the IEEE community. The address acknowledged the activities organised by IEEE GUB and expressed gratitude to the members and volunteers who had contributed to the branch's initiatives. The speaker also emphasised the importance of formally recognising individual contributions through certificates and other forms of appreciation. This recognition, the address highlighted, helps motivate members, acknowledge their efforts, and strengthen a culture of active participation and collaboration within the organisation.

The programme concluded with a farewell segment that reflected on the achievements of the 2025 Executive Committee and celebrated the formal transition of leadership to the 2026 committee. The event recognised the contributions of dedicated volunteers and active members while encouraging the incoming leadership to uphold the values of collaboration, responsibility, and technical excellence. Overall, the ceremony provided an opportunity to appreciate the work of the outgoing committee, strengthen relationships within the IEEE GUB family, and establish a positive foundation for the activities of the new leadership.
